

BULLY TABLE

The Bully Table is constructed from aluminum with a custom patina. Four quarter-inch thick plates are laser cut, formed, and plug welded to create the base with no visible fasteners. The half-inch thick aluminum top registers on the base with four hidden pins. The visually bulky legs with thin profile, coupled with the merging curves of the base plates create a visually dramatic effect as one moves around the table's perimeter.

Made in Chicago.

Material: aluminum, custom patina

Dimensions: 96" L x 42" W x 29.5" H

Availability: upon request

Custom dimensions & patinas are available upon consultation with the studio.
