

ICB VESSELS

'Ice Casting' is an experimental process developed by Steven Haulenbeek that applies lost-wax casting processes to the abundance of snow in the Chicago winter to create uniquely textured objects and furniture cast in bronze.

Made in Chicago.

Material: Cast Bronze

Finishes: Dark Bronze, Antique Bronze (shown), Silver Nitrate, Satin Bronze

Dimensions: Variable - contact the studio for a complete list of vessels.

Availability: Edition of 5 + 2 AP

Custom dimensions & colors are available upon consultation with the studio.
