

RBS ARCH SIDE TABLE (2019)

The RBS Arch Side Table, an extension of the hand-made Resin-Bonded Sand series, is created using 3D printing technology. Each form, individually printed with foundry sand, is then custom textured and cured with resin in the studio. Four pieces vertically lock together with a stone tile to create a stacked table, enabling any number of configurations.

Made in Chicago

Material: Resin-Bonded Sand

Dimensions: 12"W x 12"D x 22"H

Availability: made to order

Custom dimensions are available upon consultation with the studio.
