

RBS CORE SIDE TABLE

The RBS Core series is a new line of furniture pieces that extend on the Resin-Bonded Sand fabrication techniques. Using core drilling to form negative pockets into sand blocks which are then injected with curing resin and excavated to reveal a unique object that calls to mind natural cave formations. Finished with a high-sheen resin top, this series can be developed to custom dimensions, to create table tops and seating.

Made in Chicago

Dimensions: 15" H x 11" W

Material: Sand, Resin

Availability: Unique
