

RBS CHANDELIER

The Resin-Bonded Sand series (RBS) was conceived through extensive work with metal casting foundries. The process utilizes bonded sand, a typically disposable byproduct of the casting industry. The RBS Series lamps are hand sculpted from the material and then made permanent by selectively curing portions with resin. Hand-carved sand elements clad the brass structure and hardware. The RBS Chandeliers are each unique and can be customized to almost any size specifications.

Made in Chicago

Material: Sand, Resin, Brass

Dimensions: 60" x 40" x 24"

Availability: Unique

Custom dimensions & colors are available upon consultation with the studio.
